Re: Roseville Energy Facility, Docket No. 01-AFC-14

Dear Ms. Geftter,

The CEC Committee issued a scheduling order that planned for a Committee Status Conference in mid March 2002 regarding the Roseville Energy Facility (REF). REF has been working dilligently to respond to Staff's data requests and believes it responded to all but 9 of the 156 data requests. However, REF is continuing to work through issues regarding Transmission System Engineering mitigation, natural gas routing and finalizing the emission reduction program in support of the REF project. These activities have taken longer to resolve than orginally anticipated.

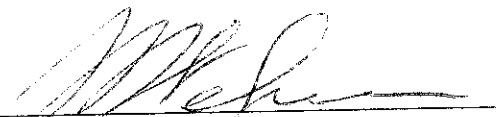

It is our belief that it is in the best interest of the Committee, CEC Staff and REF to reschedule the Committee Hearing from mid March to mid April 2002. This would provide REF the opportunity to work with federal and other state agencies to finalize the project issues and develop a data submittal schedule.

The submittal of Data Responses along with continuing the evaluation of the Roseville project by other state and federal agencies demonstrates our ongoing efforts to continue the licensing process. REF will continue to maintain schedule by responding to the CEC Staff's request for information.

If you should have any questions, please feel free to contact me, as I will continue to inform the CEC Committee and Staff if there are any changes to the project or REF's intentions with respect to the project.

Sincerely,

ROSEVILLE ENERGY FACILITY, L.L.C.
